Matters and Issues for South Cambridgeshire Local Plan specific hearing sessions

Matter SC9 SCDC LP Omission Sites not considered elsewhere

SC9.1 Land North of A428, Cambourne (SHLAA Sites 194 and 265)

Is the Plan unsound without the allocation of this site for development, as proposed in the relevant representations, and if so why?

Inspectors' Notes:

1. Where the case in favour of the allocation of this site relies on matters which have already been considered at the Examination, for example Matter 2 Overall Strategy, a brief reference to the evidence given in previous statements will suffice. The Inspectors will not be reopening the debate into matters that have already been considered.
2. Written submissions from representors should focus on the tests of soundness set out in the National Planning Policy Framework with reference, as necessary, to any detailed information about sites which was submitted as part of the original representations. This is not an opportunity to submit new evidence, and statements which seek to do so will not be accepted.
3. So far as the Councils' response is concerned, the Inspectors would appreciate a brief explanation of when and where the sites were considered during the preparation of the Plans, such as detailed references for the SHLAA, the SA, or other evidence base documents, as appropriate.
